AISWARIYA A

REACT / FRONTEND DEVELOPER

aishwariyaa.a01@gmail.com | +91 9025377269 | Kanyakumari, Tamil Nadu, India
LinkedIn | GitHub | Portfolio

SUMMARY

Frontend developer (B.E. CSE, 2026) with hands-on **React.js**, **JavaScript (ES6+)**, and **React Hooks** experience building responsive, component-based single-page applications. Built 3 projects, including a 20+ page role-based fleet management dashboard with reusable components, **React Router**, and **Context API** state management. Comfortable with **Git/GitHub** workflows and form validation. Seeking a Junior React / Frontend Developer role.

SKILLS

Languages: JavaScript (ES6+), JSX, HTML5, CSS3
Frameworks & Libraries: React.js, React Hooks (useState, useEffect, useContext, useMemo), React Router, Context API, Bootstrap 5, jQuery
Frontend Concepts: Responsive Web Design, Mobile-First Design, Semantic HTML, Component-Based Architecture, Reusable Components, State Management, Single-Page Applications (SPA), Client-Side Routing, Form Validation, Flexbox & CSS Grid
Tools & Practices: Git, GitHub, npm, Vite, VS Code, Vercel (deployment), Browser localStorage, Cross-Device Testing

PROJECTS

FleetFlow — Logistics & Fleet Management Dashboard (React.js)
React 19, JavaScript (ES6+), React Router, Context API, Vite, CSS3 | Frontend application (no backend)

- Built a role-based, responsive admin dashboard with 20+ routed pages (users, customers, drivers, vehicles, warehouses, shipments, deliveries, maintenance, reports, audit logs) and demo access for 5 user roles using React Router.
- Developed reusable, component-based UI (data table, form, modal, status badge) supporting search, status filtering, pagination, add/edit/delete with confirmation, and CSV export across every module.
- Managed application state with React Hooks and Context API, persisting data in browser localStorage; implemented a shipment tracking timeline, warehouse workflow steps, KPI dashboard, and password-strength form validation.
- Optimized for mobile, tablet, and desktop using Flexbox, CSS Grid, and media queries, with keyboard focus styling for accessibility.

Lumiere Skincare — React.js E-commerce Website
React.js, JavaScript, HTML5, CSS3 | GitHub | Live Demo

- Built a 4+ page responsive e-commerce site (Home, Product Catalog, Skin Type Quiz, Ingredients Spotlight, Contact) as a React single-page application and deployed it on Vercel.
- Designed 10+ reusable React components and implemented client-side routing across pages, cutting duplicate UI code and simplifying navigation.
- Implemented form validation across contact and quiz forms and tested key user interactions to ensure expected functionality.

Responsive Restaurant Website
HTML5, CSS3, Bootstrap 5 | GitHub

- Developed a responsive multi-page restaurant website (Home, Menu, Contact) using semantic HTML5, CSS3, and Bootstrap 5 with a mobile-first layout approach.
- Performed cross-device testing of navigation, links, and layouts across desktop, tablet, and mobile viewports; fixed 10+ UI/spacing inconsistencies.
- Improved visual consistency by standardizing a shared CSS style system (colors, spacing, typography).

INTERNSHIP EXPERIENCE

Full Stack AI Development — Iconix Software Solutions
Aug 2024 – Sep 2024 | Tirunelveli

- Trained on full-stack fundamentals covering frontend, backend, and AI integration concepts across the software development lifecycle.
- Built small HTML/CSS/JavaScript frontend exercises applying these concepts, reinforcing fundamentals used in later React projects.

Java Intern — Srishti Innovative
Oct 2024 – Nov 2024 | Technopark, Trivandrum

- Wrote and debugged Core Java programs in Eclipse IDE, strengthening logic-building and problem-solving skills applicable to JavaScript development.

EDUCATION

B.E. Computer Science and Engineering — Sivaji College of Engineering & Technology, Anna University
2022 – 2026 | Tamil Nadu

CERTIFICATIONS

- IBM SkillsBuild — Web Development Fundamentals
- Microsoft Learn — Introduction to Generative AI and Agents
- Paper Presentation — New Gen AI in Web Application Security
- Workshop — Virtual Reality Changing Engineering Industry
