PROFILE SUMMARY

Computer Science and Engineering student with practical experience in HTML, CSS, and JavaScript, along with Core Java knowledge. Passionate about building web applications and keen to contribute to meaningful projects while growing in a passionate environment.

SKILLS

Programming

- Java (basics: OOP, loops, arrays)

Web Technologies

- HTML5
- CSS3
- Java Script
- JQuery

Tools

- VS Code
- Git and Github

Soft Skills

- Communication
- Teamwork
- Problem-Solving

EDUCATION

BE Computer Science & Engineering Sivaji College of Engineering & Technology, Anna University | 2022-2026

HSC - Government Higher Secondary School, Palukal | 2022

SSLC - Government Higher Secondary School, Palukal | 2020

INTERNSHIPS

Java Intern -Srishti Innovative Educational Services | 5 October 2024 - 16 November 2024

Full stack AI Development Intern - Iconix Software Solution | 26 August 2024 - 31 August 2024

CERTIFICATES

Workshop - Virtual Reality Changing Engineering Industry - Cad Desk Training Institute | 2022

Paper Presentation - New Gen AI in Web Application Security - Ponjesly College of Engineering | 2024

Paper Presentation - Blockchain Based CyberSecurity - Sivaji College of Engineering & Technology | 2025

PROJECTS

Military Soldier Safety and Weapon Detection using YOLO and Computer Vision

- Developed a Military Soldier Safety and Weapon Detection system using YOLO and Computer Vision to detect weapons and potential threats in real time.
- Implemented object detection and tracking to identify armed individuals from live video streams and images with improved accuracy.
- Enhanced situational awareness and soldier safety by automating threat detection, reducing manual monitoring and response time.

Online Food Ordering Website

- Developed a responsive restaurant order website using HTML and CSS.
- Enabled user-friendly navigation and interactive ordering interface for a smooth experience.
